Sorry Hieu, and everyone, I'm a control freak and changed the presentation.. Don't hate me. lol. We can go back to the previous scheme if y'all want but I wanted to organize it better, add more info, to fit the rubric. Still not complete though. We need to be ready for wednesday! So soon. Let me know what y'all think so far

In addition, I put the design document and this attached presentation on github. Hieu, if you could, please put the final Planning document on github as well so we have a complete documents folder.

Looks good. Just pushed the final planning and the first draft of the design on Git.

Great presentation! I went through and marked it with a few suggestions. You definitely hit all of the criteria and we can even show Stringfellow this tomorrow. Awesome job Anne!

Here's the team logo without the white background, it might fit the powerpoint better.

We still need to decide on who's going to talk about what. Here's a list of the current slides in order on the

presentation:

Introduction
Our Objective
System Architecture
Previous Version
New Objectives
Big-Picture Plan
SDLC: Waterfall Model
Team Organization
Interface Design
UML Use Case Diagram
UML Sequence Diagram
UML Class Diagram
Conclusion

Send out an email when you see this saying what you wanna talk about. We got this presentation!
