Check out github and give it a once over. Not perfect but hopefully good enough.

I edited the Project file so the requirements and planning document were to be done today, instead of several days ago, but it was not fun making those changes with all the dependencies.

Its the first draft, but hopefully she doesn't make too much of a big deal on the project schedule.

Once everyone gives me edits or the okay, I'll print it and send it to her.

Thanks, A team!

Cool! I just had two very MINOR comments in there. You can review them and decide if there needs to be any change. Other than that, job well done Anne!

Thanks Sanan. Would love an ok or feedback from all of you guys too, don't want to submit unless everyone is ok with it.
