Here's the comparison between the two styles with the Slider version updated correctly.

Either way is good, I just need to know which one to push up to the main repo. Send out an email with your opinion and we'll figure out which screen to use in the document!

I like it without slider. Looks cluttered with slider.

Alright, no slider it is. I'll push up the updated GUI

I made some edits. Took out topology and just called it system architecture again because it seems to me topology involves networks primarily.
